

1. Diketahui data dalam yang tersimpan dalam bentuk JSON adalah sebagai berikut:

```
[
  {
    "name": "Hadassah Craig",
    "phone": "(361) 775-9823",
    "email": "ornare.lectus.justo@purussapiengravidac.ca",
    "address": "Ap #818-7076 Dapibus Rd.",
    "country": "Turkey",
    "postalZip": "41108"
  },
  {
    "name": "Fallon Stark",
    "phone": "1-736-820-3814",
    "email": "ante.bibendum@a.net",
    "address": "171-652 Porttitor Av.",
    "country": "Austria",
    "postalZip": "186313"
  },
  {
    "name": "Ariana Johns",
    "phone": "(218) 515-4227",
    "email": "gravidaliquam@libero.net",
    "address": "3461 Ut, St.",
    "country": "Peru",
    "postalZip": "19451"
  },
  {
    "name": "Cathleen Harrington",
    "phone": "(188) 809-9375",
    "email": "eu.elit@dolor.net",
    "address": "4826 Arcu Rd.",
    "country": "Turkey",
    "postalZip": "22902"
  },
  {
    "name": "Martina Palmer",
    "phone": "1-746-661-9065",
    "email": "convallis@atsemolestie.org",
    "address": "P.O. Box 438, 6577 Arcu St.",
    "country": "Germany",
    "postalZip": "5286"
  }
]
```

2. Dari data di atas tentukan:

- Key, dan Value nya dalam bentuk tabel
- Code Class dengan Kotlin (Cek Materi Praktikum 1)
